Forecast for Tuesday 05 Sep 2023

Weather: Fine through the early hours and into daybreak, with shallow mist and fog forming in prone valleys. This will soon clear to leave a dry and very warm day with lengthy periods of sunshine and perhaps some hazy higher cloud. One of the more notable aspects of the forecast however is likely to be the wind, which will become strong at elevation. This may mask otherwise high temperatures and moderate UV, with the latter more of a risk given the duration of sunshine expected. Winds falling light in some valleys during the evening to see mist reform.

Chance of cloud-free hill tops above 600m: Near 100%.

Low cloud and visibility: Early valley mist and fog soon clearing, with good visibility otherwise expected. Prospect of some high level haziness throughout.

Forecast for Tuesday 05 Sep 2023

Forecast for Wednesday 06 Sep 2023

Weather: There is a risk of extensive low cloud and valley fog first thing, mainly in valleys with an easterly exposure, however this will soon clear to a very warm day of hazy sunshine and moderate UV.

Maximum wind: Easterly 20mph.

Chance of cloud-free hill tops above 600m: Near 100%

Low cloud and visibility: Low cloud and fog soon clearing. Good visibility, again with high-level haziness likely.

Temperature: **Valleys:** Plus 11 becoming plus 26 degrees Celsius
At 600m: Plus 19 degrees Celsius
Freezing level: Well above the peaks.
